Free Standing Tub

Installation Procedure

Professional Installation Recommended

BEFORE INSTALLATION

ATTENTION:
Please inspect the tub carefully for any defect or damage before installation. Once installed, any defect or crack will not be under warraty.

1) Floor must be flat & level.

2) Floor must be built to support 65-lbs per square foot load.

3) Delicately unpack the tub and inspect for any defect or damage before installation.

4) See dimensional drawings to locate drain position.

Installation Procedure

DRAIN & OVERFLOW SYSTEM

PLEASE NOTE: The Drain & Overflow System is already installed. The following illustration is for informational purposes only.

NOTE: Plumbing connection must be installed by professional according to code.

TUB INSTALLATION

1) Prepare the piping to connect to the drain.
   (Professional Installation Recommended)
2) Verify the fitting to connect the drain.
3) Once the pipe under the floor is ready put the tub in place and connect underneath.
4) Proceed to finalise piping connections.

GENERAL TUB MAINTENANCE & REPAIR

- Use liquid detergent & soft cloth to clean bathtub regularly.
- Do not use detergent containing acetone or ammonia. Also do not use abrasives or detergents containing chemical solvent or solid particles; it could easily scratch.
- To repair scratches in the acrylic, use #1500 wet polishing sand paper to grind. Subsequently, use a cloth with car wax to polish the scratch to obtain a glossy finishing.
- To remove joint compound, use a plastic or wood spatula wrapped with a damp cloth. Do not use any metal tool or brush.
- If a rubber mat is used inside the tub, it is necessary to remove it after every bath. Otherwise, potential damage could be caused and will not be covered by warranty.

CONGRATULATIONS!!!

Now your Tub should be ready for use! Enjoy your bath!
